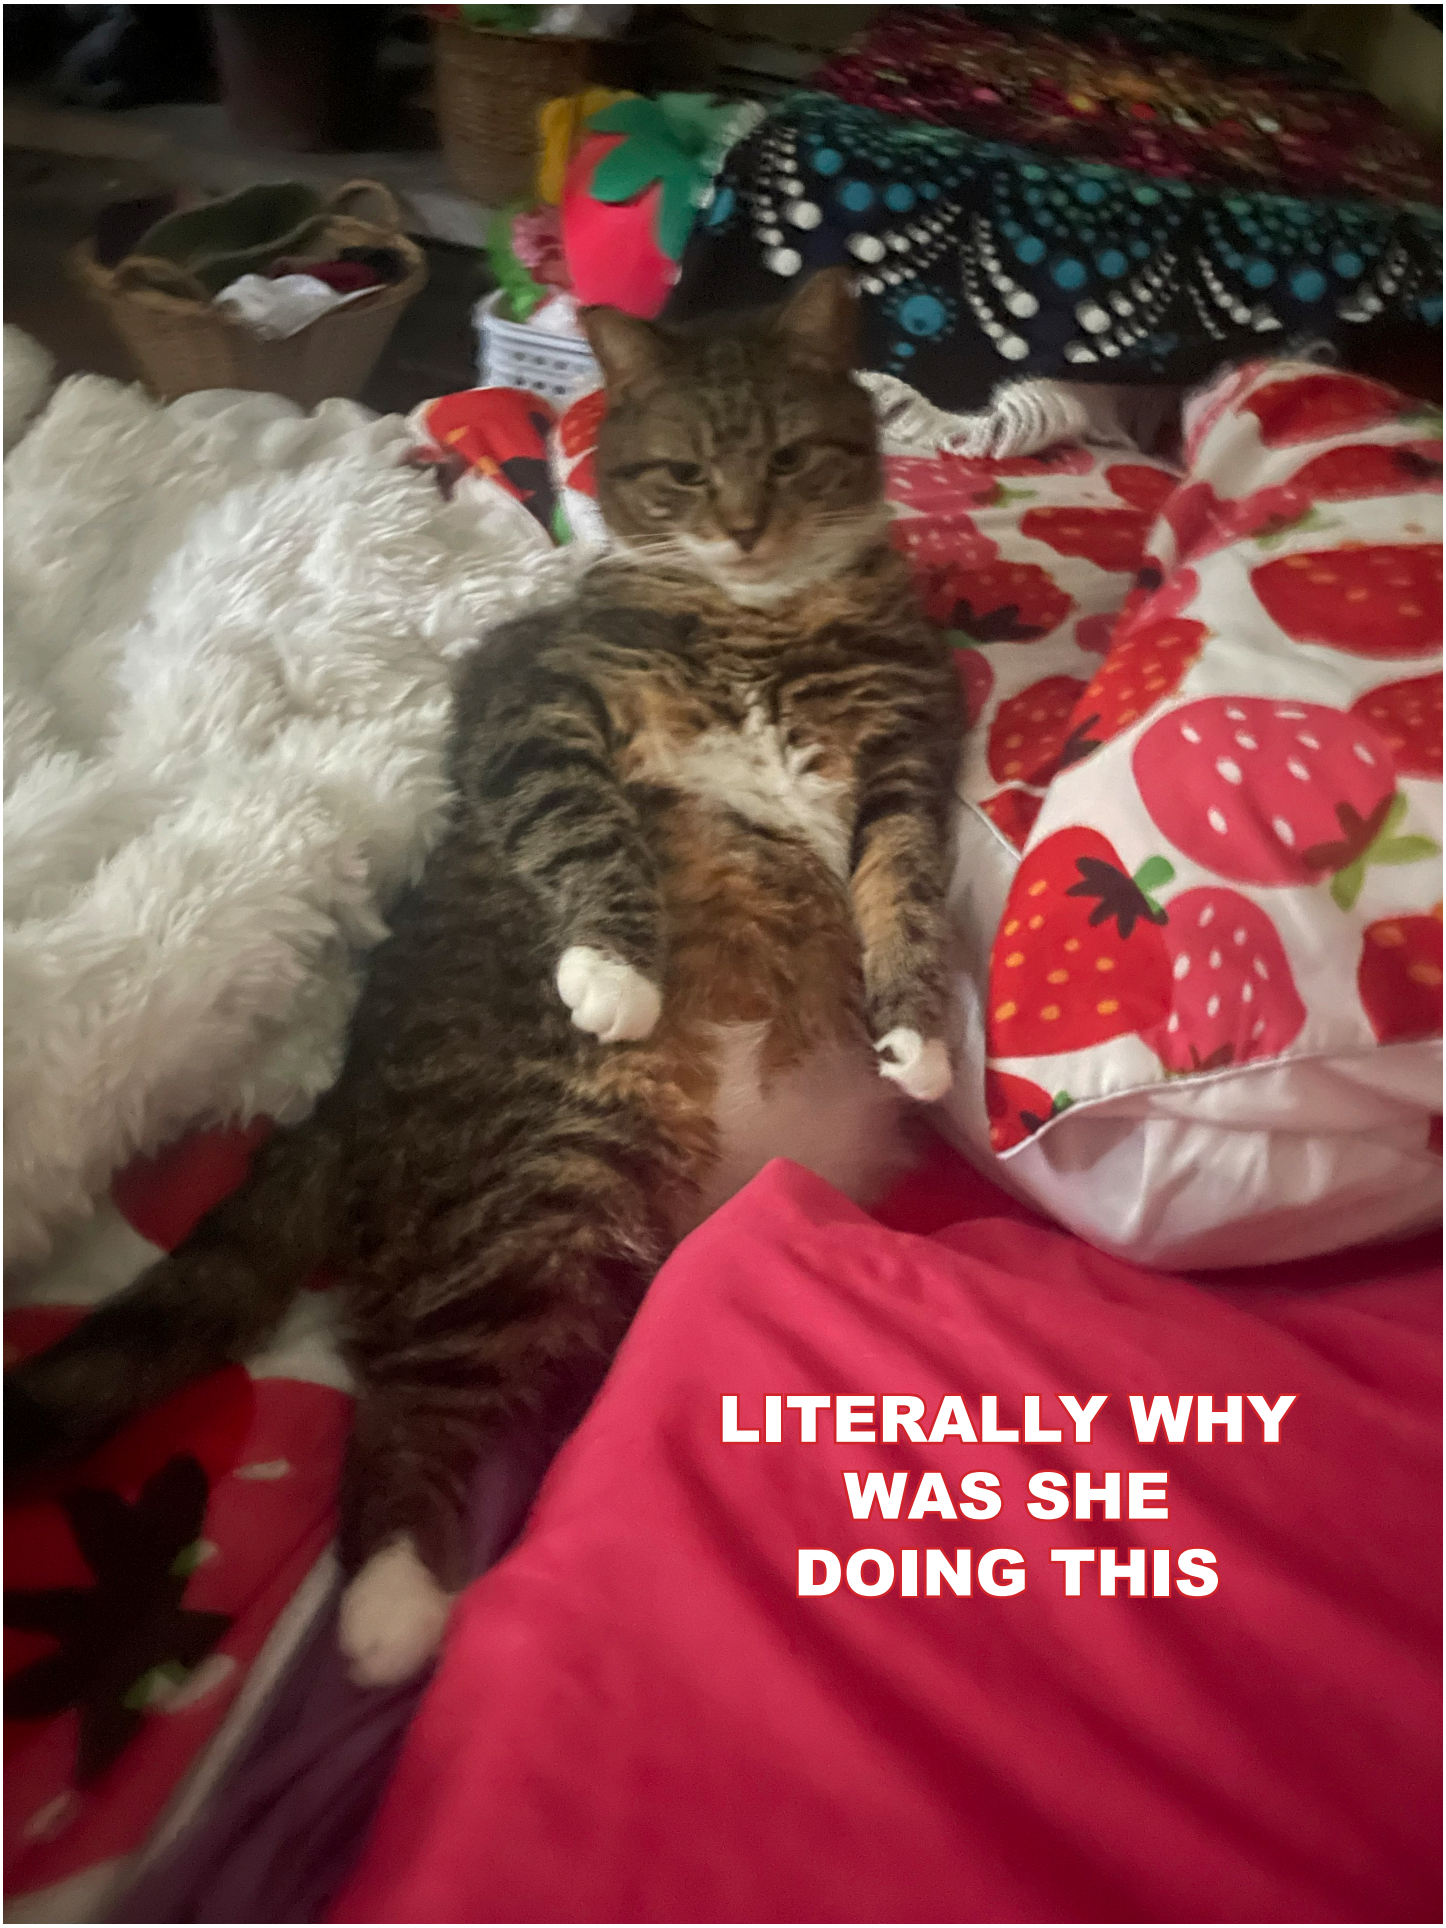
Sally Cat

Crossed paws in mid air literally
why was she doing this



LITERALLY WHY
WAS SHE
DOING THIS

A collection of Sally Cat images taken on iPhone 12 and put together in Adobe InDesign 2024.

Sally was found as a kitten in the Evans family backyard in fall 2017. They rescued her life when the weather began getting colder and she was chased into their pond by their Saint Bernard, Prometheus. Sally has been a chaotic addition to the Evans household ever since.
